

Health Plan	Marketplace or Commercial	Product	Cost Category	Month	Forecast Option
All	Marketplace	All	All	January 2026	Forecast - Normal

Flash reports should be viewed as directional in nature and exclude any potential favorable or unfavorable one time and/or prior period development adjustments

Forecast Variance Snapshot						
LOB	PMPM Magnitude of beat/miss Projection vs. Forecast	PMPM Current Projection vs. Forecast	Total	Inpatient	Non Inpatient	RX
Medicaid		Too Close to Call	1.4% \$83.1M	0.8% \$12.2M	1.8% \$61.1M	1.0% \$9.8M
Marketplace		Beat	4.9% \$118.1M	1.0% \$8.2M	8.8% \$94.8M	3.0% \$15.1M
Medicare		Beat	4.8% \$65.5M	3.7% \$15.3M	(0.5%) (\$2.3M)	11.1% \$52.5M

Uncertainty/variability of Flash’s projection is higher earlier in the month.

% variances are based on PMPM. \$ variances are membership/volume adjusted (forecasted PMPM vs. actual PMPM applied to actual membership).

Month-end close recorded results may differ from Flash projections and typically contain more conservatism.

80-81% of expenses are covered in the Flash Report vs. total Health Plan medical expenses reported in the General Ledger. Not included in the Flash report are capitated expense (~7-8%), direct medical (~3-4%), Rx rebates and low income subsidies (~4%), reinsurance (~1-2%) and other immaterial (remaining). These additional expenses can move total variance in either a favorable or unfavorable direction.

Prior month projections are also ‘live’ and projections benefit from more claims experience.

Any new Health Plan-Product less than 6 months old is not included in projections or the forecast figures Flash uses.
