

# Intro (5-7 min)

Thank you so much for attending today, we really appreciate your time. I'm going to start transcription of this meeting to help me with note-taking.

## <Start Transcription>

Right now, our **Provider Engagement** teams are experiencing the “Swivel Chair Effect” in you work. You have to access several tools to get information to compare providers in your portfolio, identify “where the fire is”, dig into a specific provider and know which actions they can take to improve their business.

To make you more efficient, we're building a robust tool called Provider Performance Assessment Dashboard (PPA).

- a. First the **Portfolio** section allows you to compare and prioritize a health plan's “portfolio” of providers in their market. It's where you see key performance metrics, comparisons, trends, changes over time, state/county views. And it shows “where the fire is”.
- b. The **Provider** section offers multiple views and data on a specific provider group. It offers performance reports, actionable insights, performance by panel/ membership characteristics, detailed performance pages, and member level exports.

You're part of this discussion because you'll be the hands-on users of this dashboard. We're bringing you to the table and asking for your feedback because we want to create the best possible product for you. This dashboard is being delivered in December 2025, and today's discussion will lead to dashboard enhancements in 2026.

We're going to give you a quick overview. Then we're doing to focus on very specific screens, and I'll ask you a few questions. We really need you to think critically about these screens, and how you would use them in your everyday work. We also need you to come off mute to answer our questions and engage with us.

Any questions before we begin?

-----

# PPA Structure (10 min)

Give quick overview of tool Portfolio > Provider > Details

## Q1. Confirm the user flow:

“After walking through Portfolio, then Provider, then Details/Actions, does this flow match how you naturally think about your work? If not, what would you change about the order or transitions between sections?”

# Provider / Details (30 min)

Summary, Membership, Detail, Export ← Go in more detail on these screens.

## Q2. Provider section – readiness for provider conversations

“Imagine you're about to meet with a specific provider. Looking only at the Provider section, what information do you still need that isn't here to feel fully prepared for that conversation?” (prompt: metrics, filters, visuals, context?)

## Q3. Actions items

“Do you feel this dashboard is actionable? Does it give you the tangible things providers can work on to move the needle?”

## Q4. Highest-priority additions for v2

“If we could add only two or three things to these Provider and Detail screens for the next version, what would they be, and why those over everything else?”

## Q5. Satisfaction

“If we asked you to score this dashboard exactly as you see it right now on a scale of 1-10 (1=not at all helpful, and 10=extremely helpful), what score would you give it?”

# Q&A (15 min)
