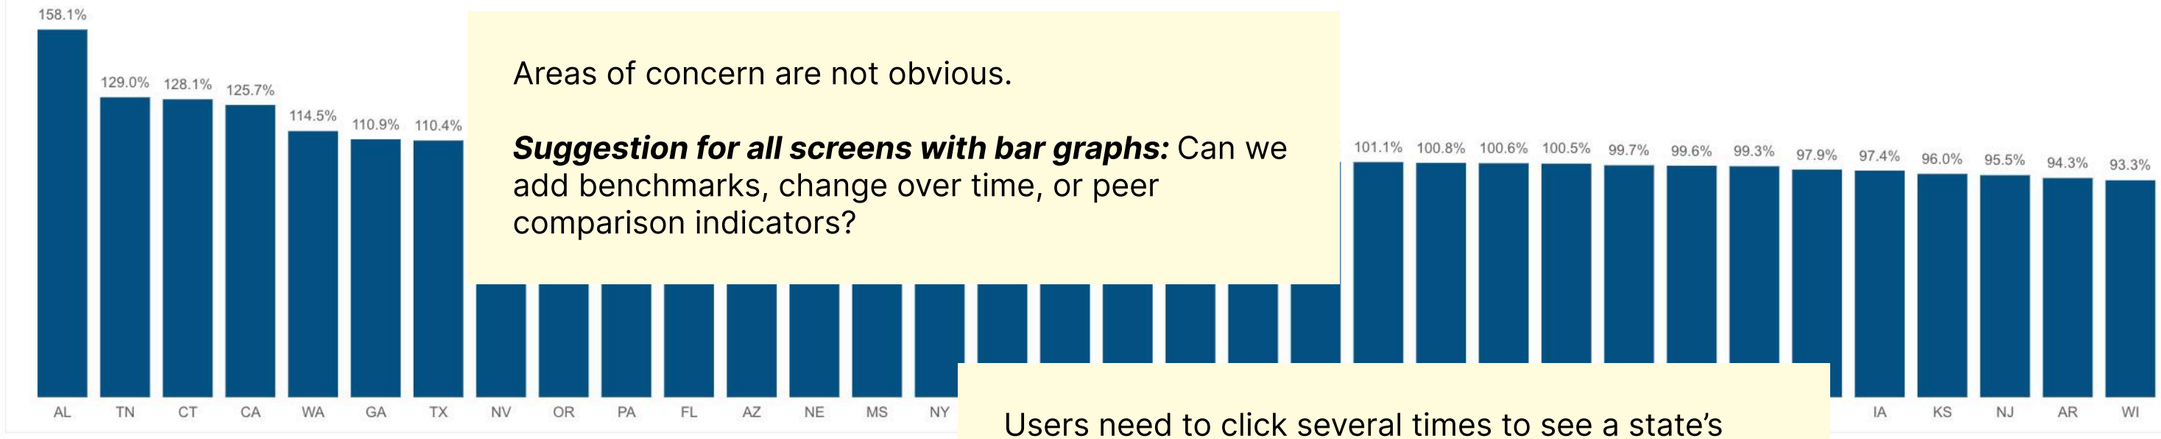
Measure Selection: HBR | Risk Score | Risk Adjusted Claims | Open Annual Visit % | Loyalty % | Total Incentives | % Members with Quality Gaps | % Members with Risk Gaps | % Members with Redocumentation



Areas of concern are not obvious.

Suggestion for all screens with bar graphs: Can we add benchmarks, change over time, or peer comparison indicators?

Users need to click several times to see a state's performance across KPIs.

Suggestion: Can Copilot be used to show states across various metrics?

For example, instead of having users review metric by metric, can we show them:

"The following states have highest HBR + highest Quality Gaps + Lowest Loyalty rates: Alabama, California, Kansas"

82%

...hing that's missing... that's good to

...a: *"definitely think it has a lot of great*
